

REUSE
REDUCE
RECYCLE

The advantages of Priplak® R100

- Priplak® R100 is made from 100% recycled PP, sorted and regranulated before conversion into sheets: it allows the scrap to be reused in the production of PP sheets,
- Priplak® R100 is completely recyclable like the rest of the Priplak range,
- Priplak® R100 answers the increasing demand the recycled products from the market,
- Either by using and/or converting Priplak ® R100, your company can support this recycling process by valorizing the waste and benefit from making a real contribution to the environment.

Product Information

Article Name : Priplak® R100
